

Cyber Workforce Fundamentals Training

Sugpiat CyberWerx offers highly qualified and certified technical training professionals with decades of Cybersecurity experience. We are proud to offer our Cyber Workforce Fundamentals Training to assist your organization. Before shifting to advance computer knowledge, our team starts with the basics - Computer Fundamentals to learn the basic functions of computer operations and administration.

For more advanced professionals, our team offers Cybersecurity Fundamentals courses as well as other detailed critical infrastructure specific cyber security training.

We will tailor our course offerings to your specific business needs. We offer online training modules and classroom instruction as required.
